## The Southwest Region

The Southwest Region of the United States is made up of 4 states. The climate is hot and dry to the west with more humidity to the east. Geographical features include the Sonoran Desert, Rocky Mountains, Colorado River, Grand Canyon, and Gulf of Mexico. Mexico borders this region to the south.

## The Southeast Region

The Southeast Region of the United States is made up of 12 states. The climate consists of a subtropical climate of hot summers and mild winters. Hurricanes can often reach landfall during the late summer months. Geographical features include the Appalachian Mountains, Gulf of Mexico, Mississippi River, and the Atlantic Ocean.

## The Northeast Region

The Northeast Region of the United States is made up of 11 states. The climate consists of cool summers and below freezing winters. Snow often falls during the winter. Geographical features include the Appalachian Mountains, the Great Lakes, and the Atlantic Ocean. Canada borders this region to the north.

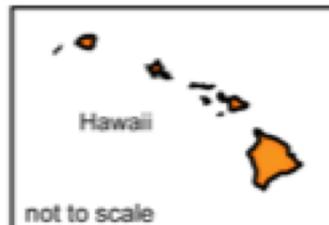

## The Midwest Region

The Midwest region of the United States is made up of 12 states. The climate is humid through most of the region. Snowfall occurs during the winter especially in the northern states. Geographical features include the Great Lakes, Great Plains, and Mississippi River. Canada borders this region to the north.

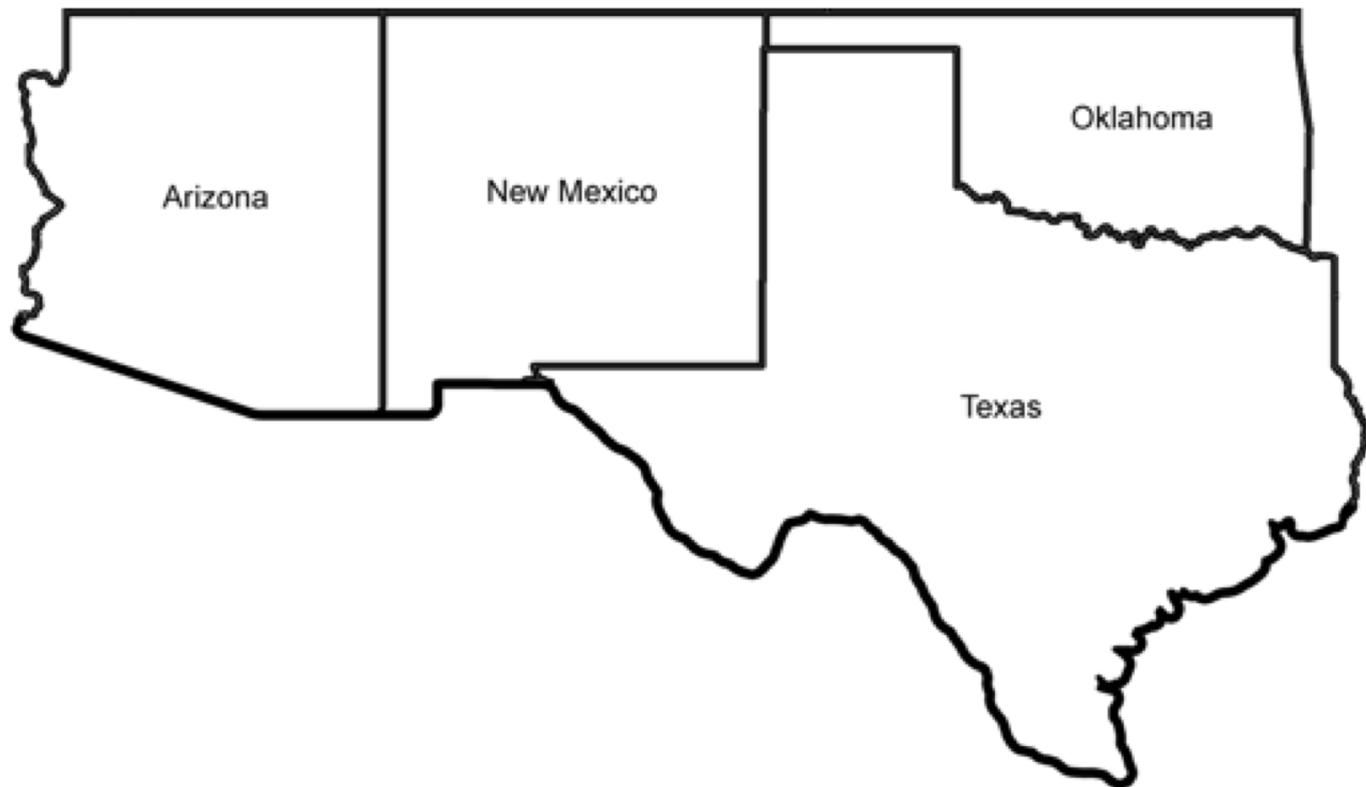

## The West Region

The West Region of the United States is made up of 11 states including Hawaii and Alaska. The climate ranges from arctic to tropical and from dry desert to mountainous climate. Geographical features include the Rocky Mountains, Sierra Nevada Mountains, Mohave Desert, and Pacific Ocean. This region borders Canada to the north and Mexico to the south.
